

PUBLIC ENGAGEMENT

opportunities & priorities

Throughout the Buckeye Lake Dam Improvement Project, there will be multiple opportunities for members of the community to provide input on critical issues. The Buckeye Lake Citizens Advisory Council will be coordinating much of this effort. It is the goal of the Citizens Advisory Council to gather input and prioritize topics which have the greatest interest for community participation.

Please select up to three (3) topics which should be priorities for community engagement and those you would be interested and willing to provide such input.
